

Price Growth Over Time

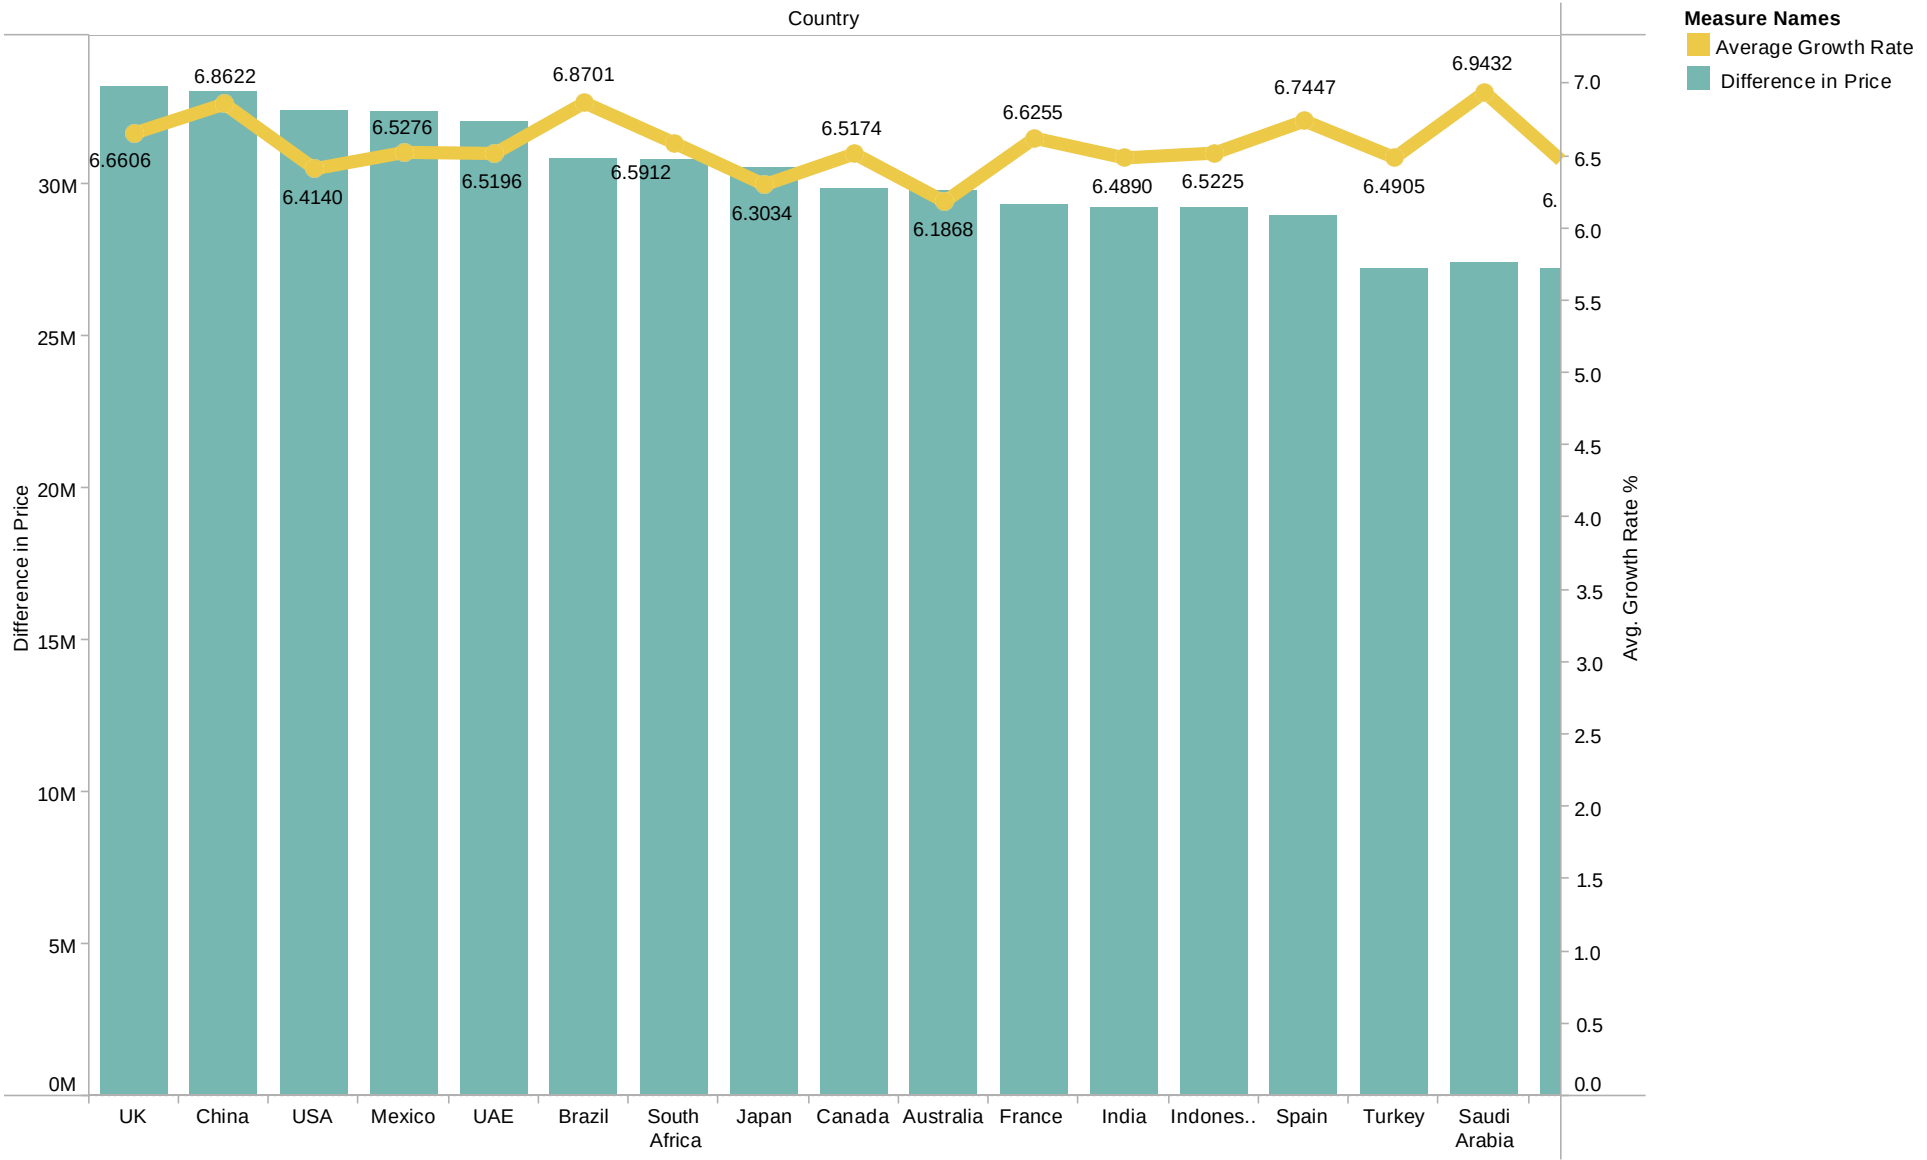

Price 2015, Price 2020 and Price 2025 for each Country. Color shows details about Price 2015, Price 2020 and Price 2025. The data is filtered on Action (Country) and Action (House Type, Income Level). The Action (Country) filter keeps 20 members. The Action (House Type, Income Level) filter keeps 12 members. The view is filtered on Country, which keeps 20 of 20 members.

Price Growth Over Time

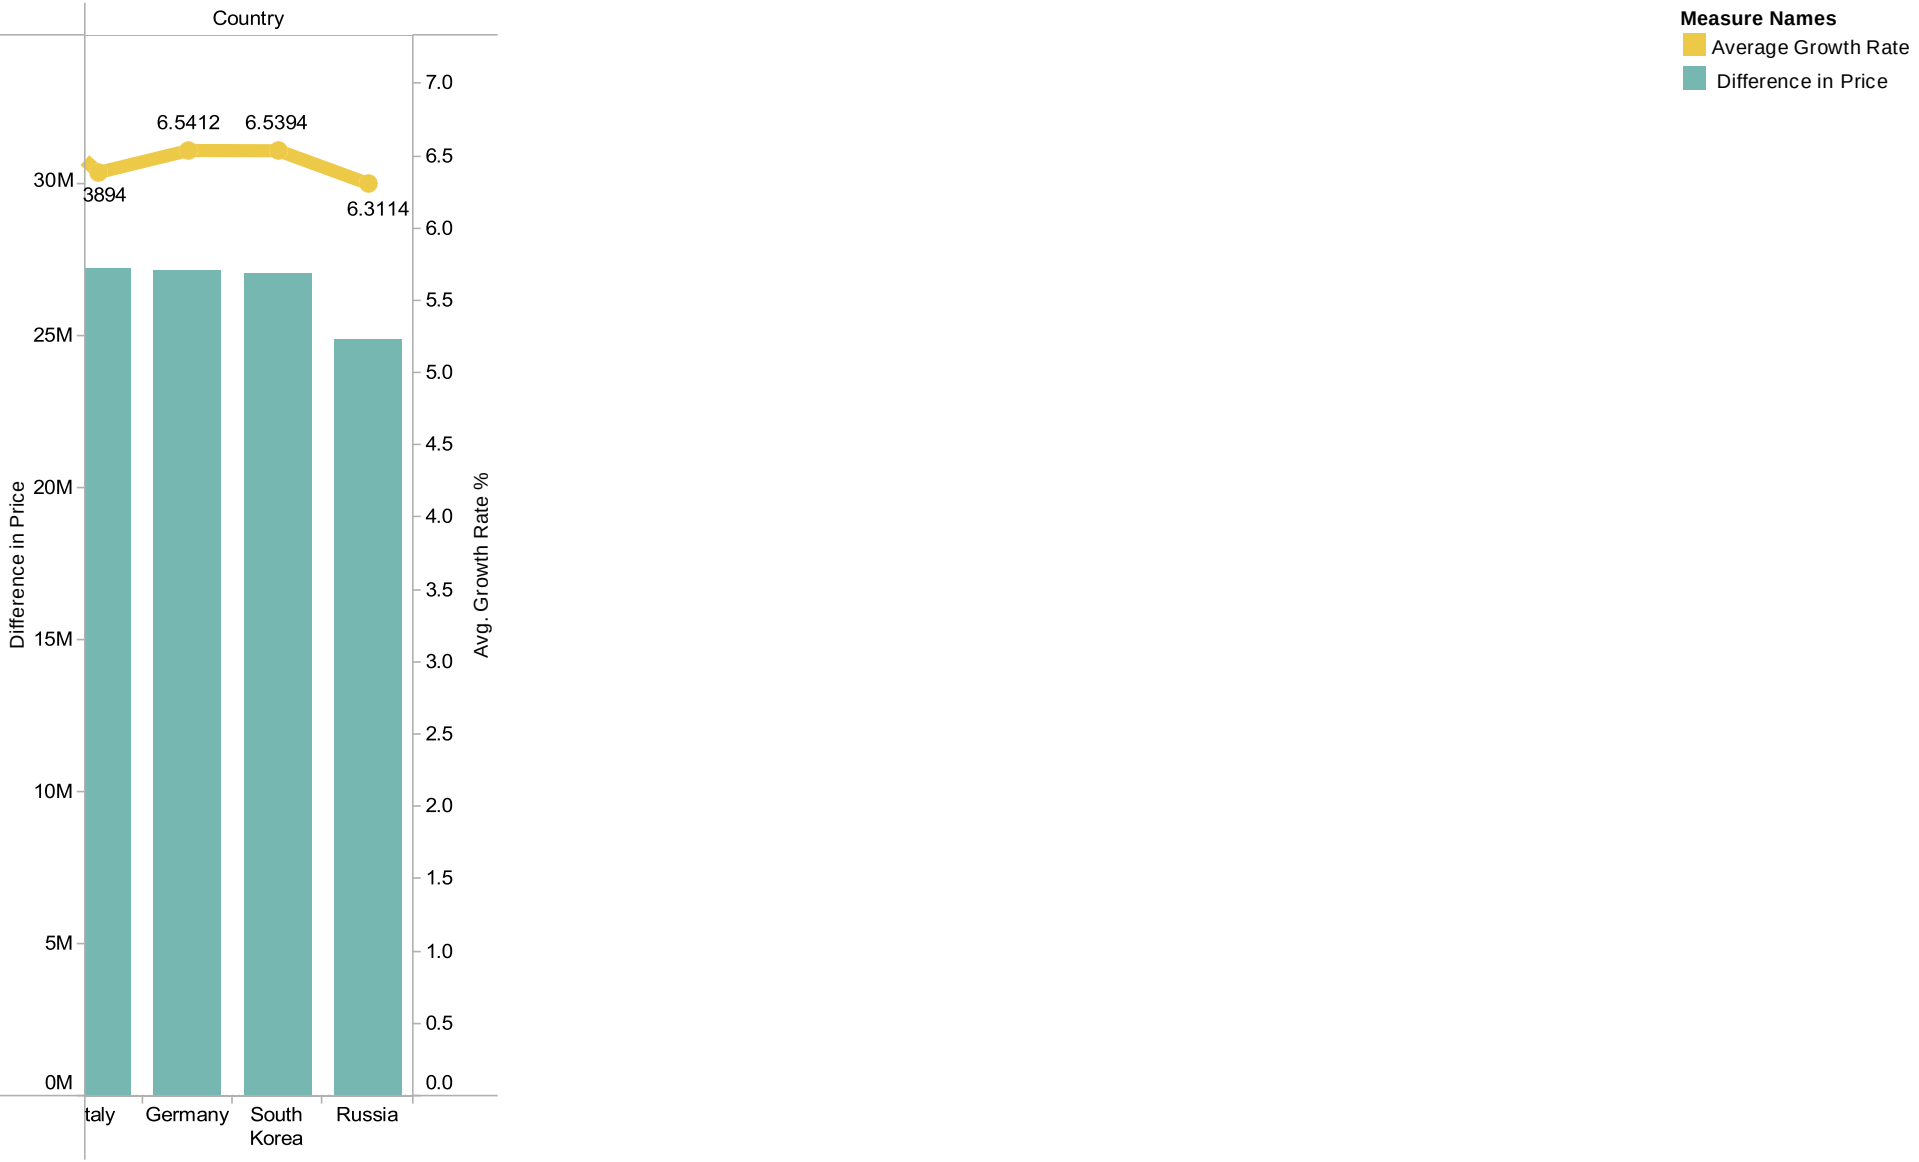

Price 2015, Price 2020 and Price 2025 for each Country. Color shows details about Price 2015, Price 2020 and Price 2025. The data is filtered on Action (Country) and Action (House Type, Income Level). The Action (Country) filter keeps 20 members. The Action (House Type, Income Level) filter keeps 12 members. The view is filtered on Country, which keeps 20 of 20 members.

Growth Rate Comparison

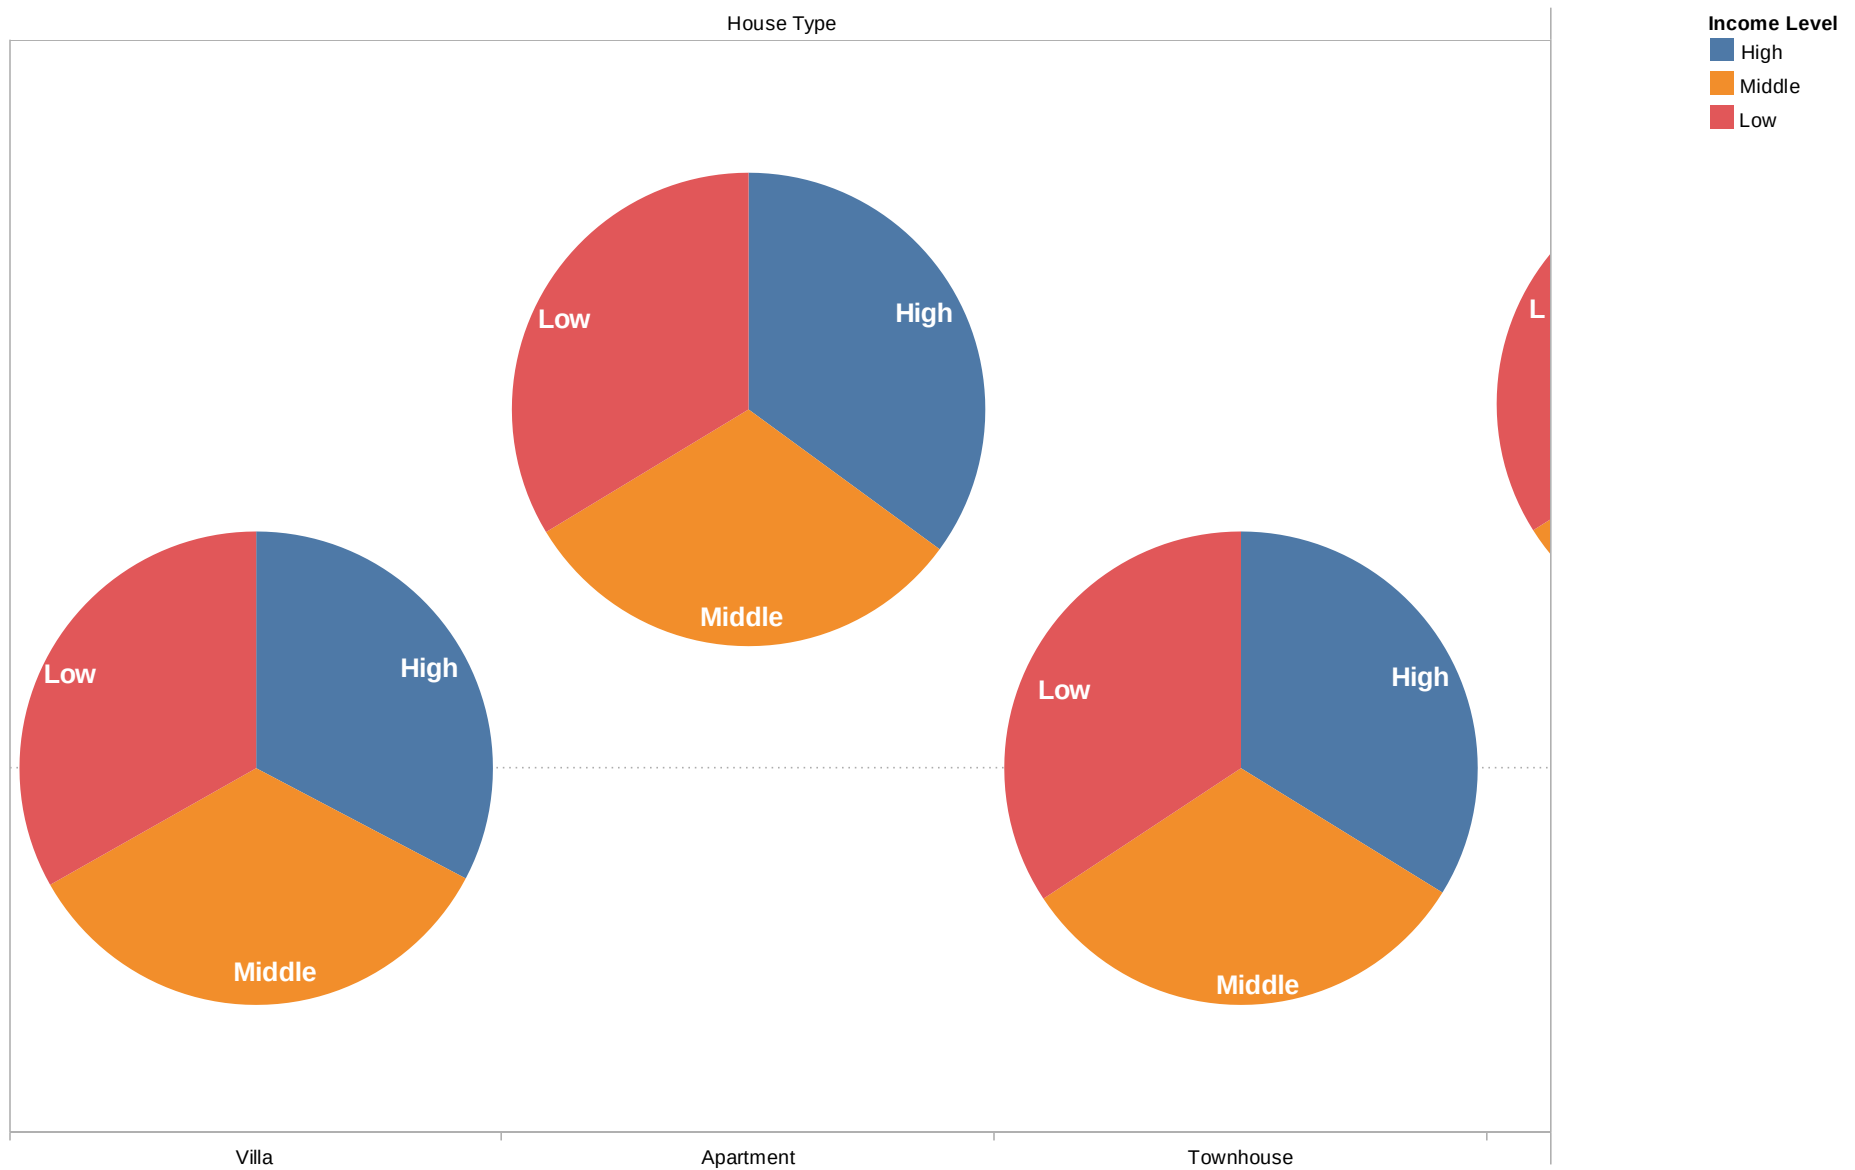

The trends of Difference in Price and Average Growth Rate for Country. Color shows details about Difference in Price and Average Growth Rate. For pane Average of Growth Rate %: The marks are labeled by Average Growth Rate. The data is filtered on Action (Country) and Action (Country, Market Status). The Action (Country) filter keeps 20 members. The Action (Country, Market Status) filter keeps 60 members.

Growth Rate Comparision

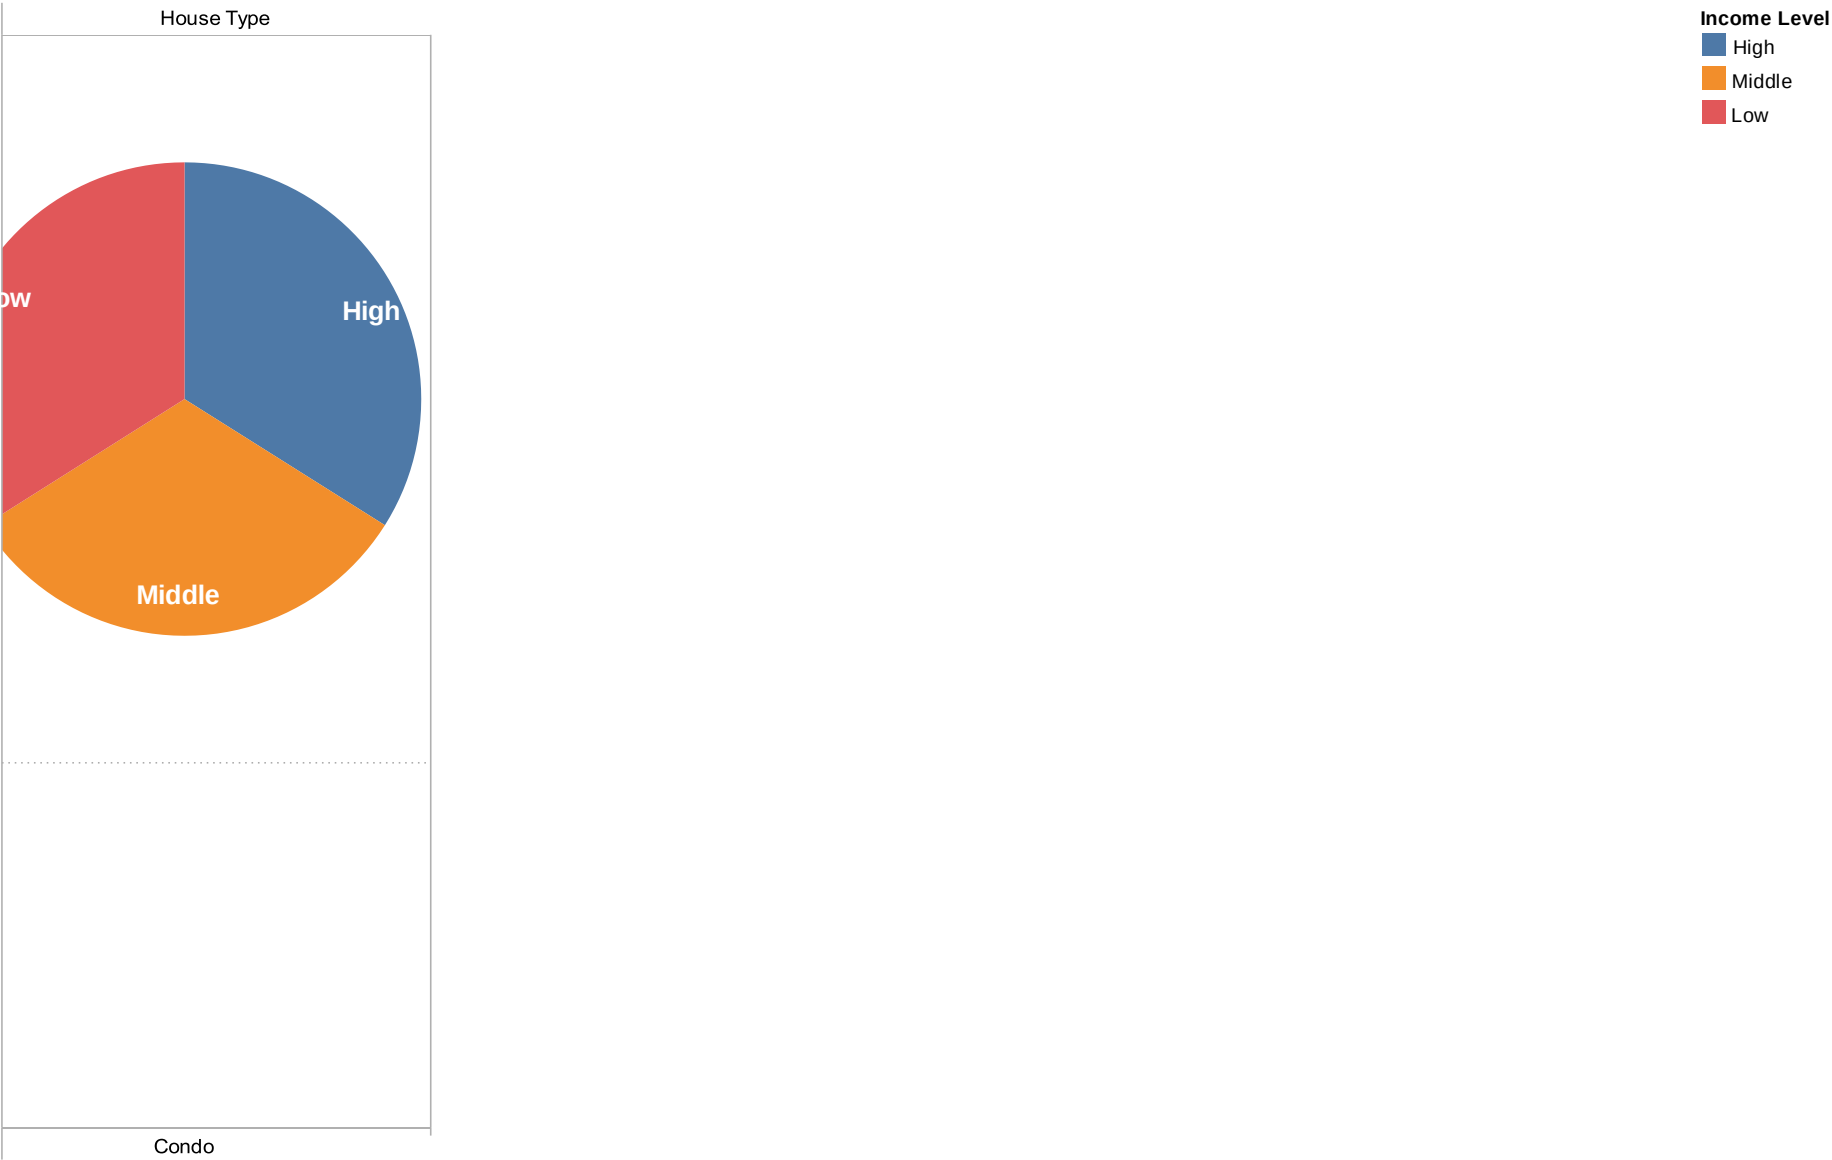

The trends of Difference in Price and Average Growth Rate for Country. Color shows details about Difference in Price and Average Growth Rate. For pane Average of Growth Rate %: The marks are labeled by Average Growth Rate. The data is filtered on Action (Country) and Action (Country, Market Status). The Action (Country) filter keeps 20 members. The Action (Country, Market Status) filter keeps 60 members.

House Type Preference

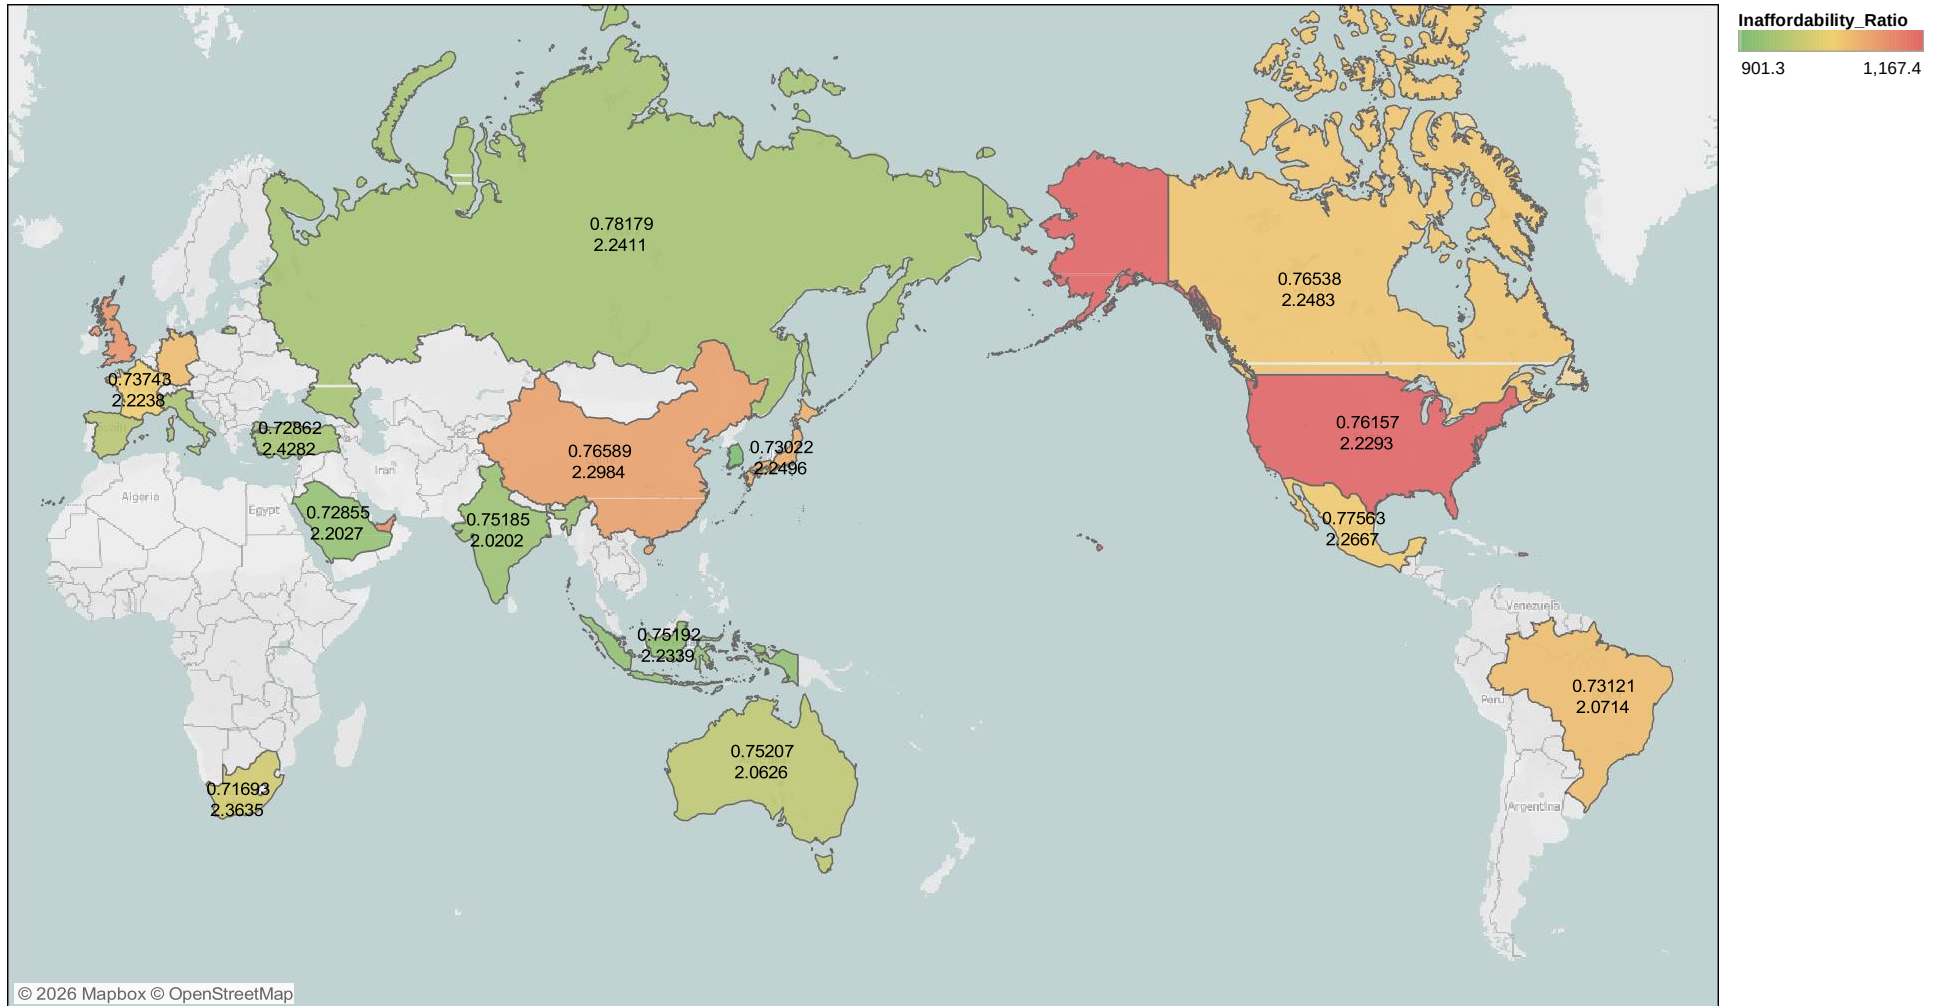

C1 for each House Type. Color shows details about Income Level. The marks are labeled by Income Level. The data is filtered on Country and Action (Country). The Country filter keeps 20 of 20 members. The Action (Country) filter keeps 20 members.

House Type Preference

C1 for each House Type. Color shows details about Income Level. The marks are labeled by Income Level. The data is filtered on Country and Action (Country). The Country filter keeps 20 of 20 members. The Action (Country) filter keeps 20 members.

Inaffordability Ratio to PPP Index

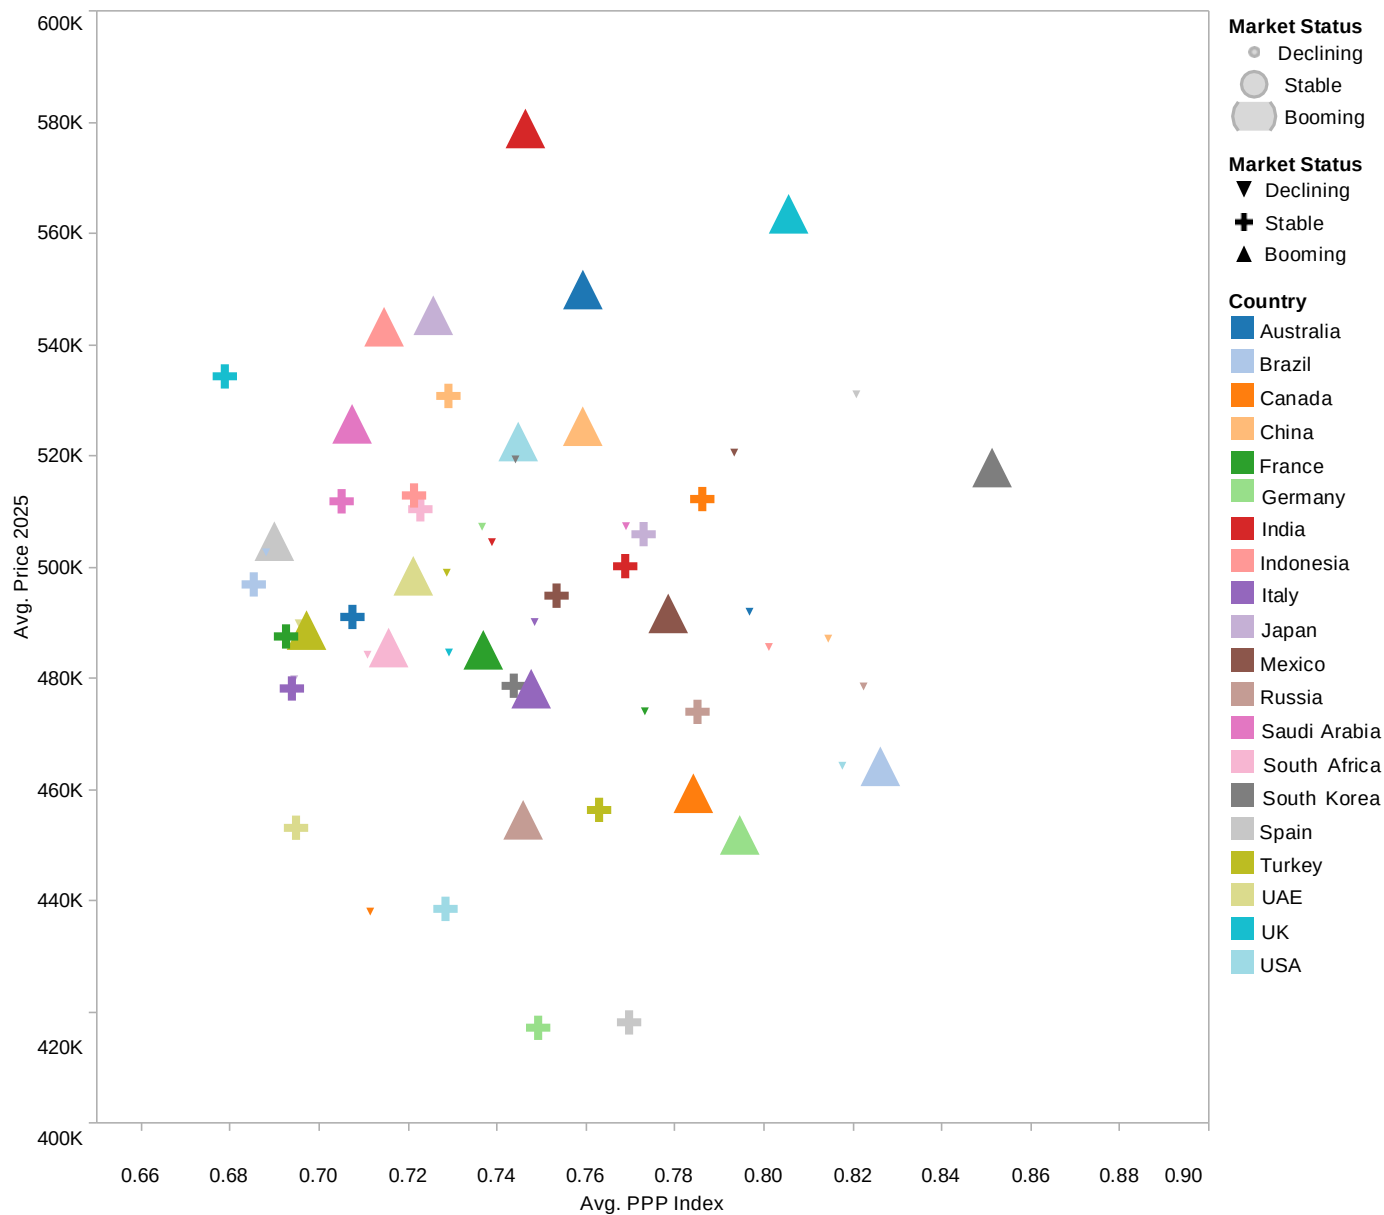

Map based on Longitude (generated) and Latitude (generated). Color shows sum of Inaffordability Ratio. The marks are labeled by average of PPP Index and average of Population Growth %. Details are shown for Country. The data is filtered on Action (Country) and Action (Country, Market Status). The Action (Country) filter keeps 20 members. The Action (Country, Market Status) filter keeps 60 members.

Inflation & Interest Rates

Country, average of Inflation % and average of Interest Rate %. Color shows details about Country. Size shows average of Inflation %. The marks are labeled by Country, average of Inflation % and average of Interest Rate %. The data is filtered on Action (Country) and Action (House Type, Income Level). The Action (Country) filter keeps 20 members. The Action (House Type, Income Level) filter keeps 12 members.

Price to PPP Index & Market Status

Average of PPP Index vs. average of Price 2025. Color shows details about Country. Size shows details about Market Status. Shape shows details about Market Status. The data is filtered on Action (Country), which keeps 20 members.

Key KPIs

Average Growth Rate	6.551
Average Difference in Price	218,712
Average PPP Index	0.747
Average Population Growth	2.238

Average Growth Rate, Average Difference in Price, Average PPP Index and Average Population Growth. The data is filtered on Action (Country) and Action (Country, Market Status). The Action (Country) filter keeps 20 members. The Action (Country, Market Status) filter keeps 60 members.

Average Inflation Rate	4.9815
Average Interest Rate	5.4626

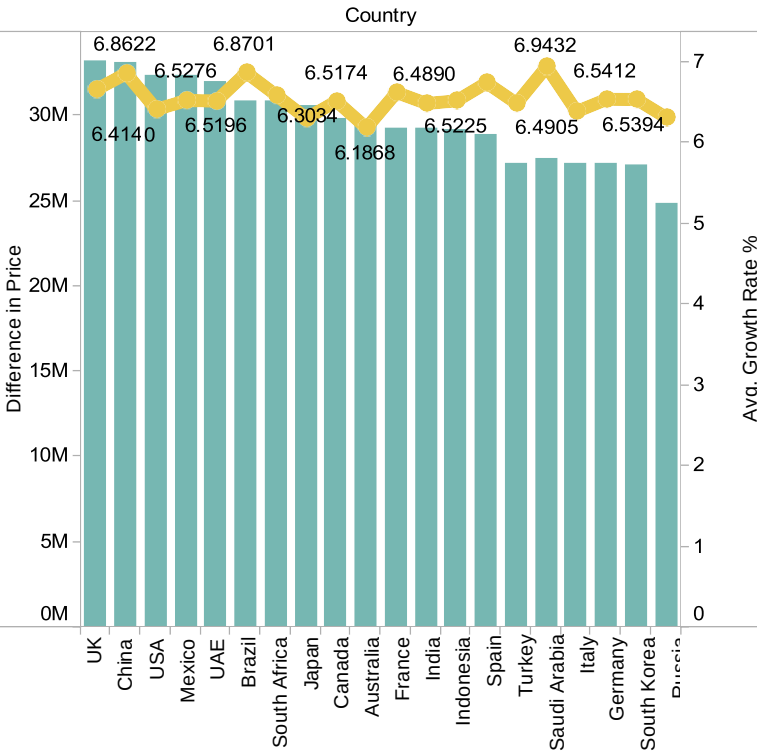

Average Inflation Rate and Average Interest Rate. The data is filtered on Action (Country) and Action (House Type, Income Level). The Action (Country) filter keeps 20 members. The Action (House Type, Income Level) filter keeps 12 members.

Housing Affordability Analysis

Title	Agenda	Introduction	Objectives
-------	--------	--------------	------------

Agenda

Introduction:

Introducing the Housing Affordability Analytics report, covering global housing trends and key economic factors influencing affordability across countries and cities.

Objective:

To analyze housing prices, affordability, and economic indicators to derive insights and understand their future impact on real estate markets.

Dataset Overview:

Quick Overview of the dataset what factors have been taken into consideration, on what basis, etc.

Data Gathering & Cleaning:

Data is collected from multiple sources and structured into a unified dataset, followed by cleaning, preprocessing, and feature creation for accurate analysis.

Visual Explanations & Dashboard Overview:

Understanding key insights through interactive visuals and dashboards to analyze housing trends, affordability, and market performance.

Conclusions:

Summarizes key findings on affordability challenges, market trends, and provides insights for better investment and policy decision-making..

Title	Agenda	Introduction	Objectives	Dataset Overview
-------	--------	--------------	------------	------------------

Introduction:

- This project presents a comprehensive analysis of housing affordability across multiple countries and major cities.
- Focus on key economic and real estate factors affecting housing markets.
- Examination of metrics such as housing prices, growth rates, PPP, income levels, and affordability ratios.
- Analysis of interest rates, inflation, and population growth impacting real estate trends.
- Segmentation of data by countries, cities, house types, and market conditions.
- Identification of global housing trends, affordability challenges, and investment opportunities.

Agenda	Introduction	Objectives	Dataset Overview	Data Gathering & Cleaning
--------	--------------	------------	------------------	---------------------------

Objectives:

- To analyze the impact of PPP, inflation, interest rates, and population growth on housing affordability.
- To study housing price trends and market performance across different countries and cities.
- To identify affordability challenges and regions with economic pressure in the housing sector.
- To generate meaningful insights that support better investment and real estate decision-making.

Intro ducti on	Objectives	Dataset Overview	Data Gathering & Cleaning	Growth Rate Co mparisi on
----------------------	------------	------------------	---------------------------	------------------------------------

Dataset Overview:

- This dataset represents **Global Housing Prices and Affordability Analysis** across multiple countries and major cities.
- It combines real estate data with macroeconomic indicators to study how factors like purchasing power, inflation, and interest rates influence housing markets.
- The primary objective of the dataset is to identify relationships between **price growth, economic strength, and affordability**.
- It helps in understanding what factors have resulted in the Increase of Housing Prices across the years of 2015 to 2025 around the Globe.

Objectives	Dataset Overview	Data Gathering & Cleaning	Growth Rate Comparison	House Type Preference
------------	------------------	---------------------------	------------------------	-----------------------

Data Gathering & Cleaning:

The Major steps in gathering these insights for making this report are:-

__ Data Scrapping:

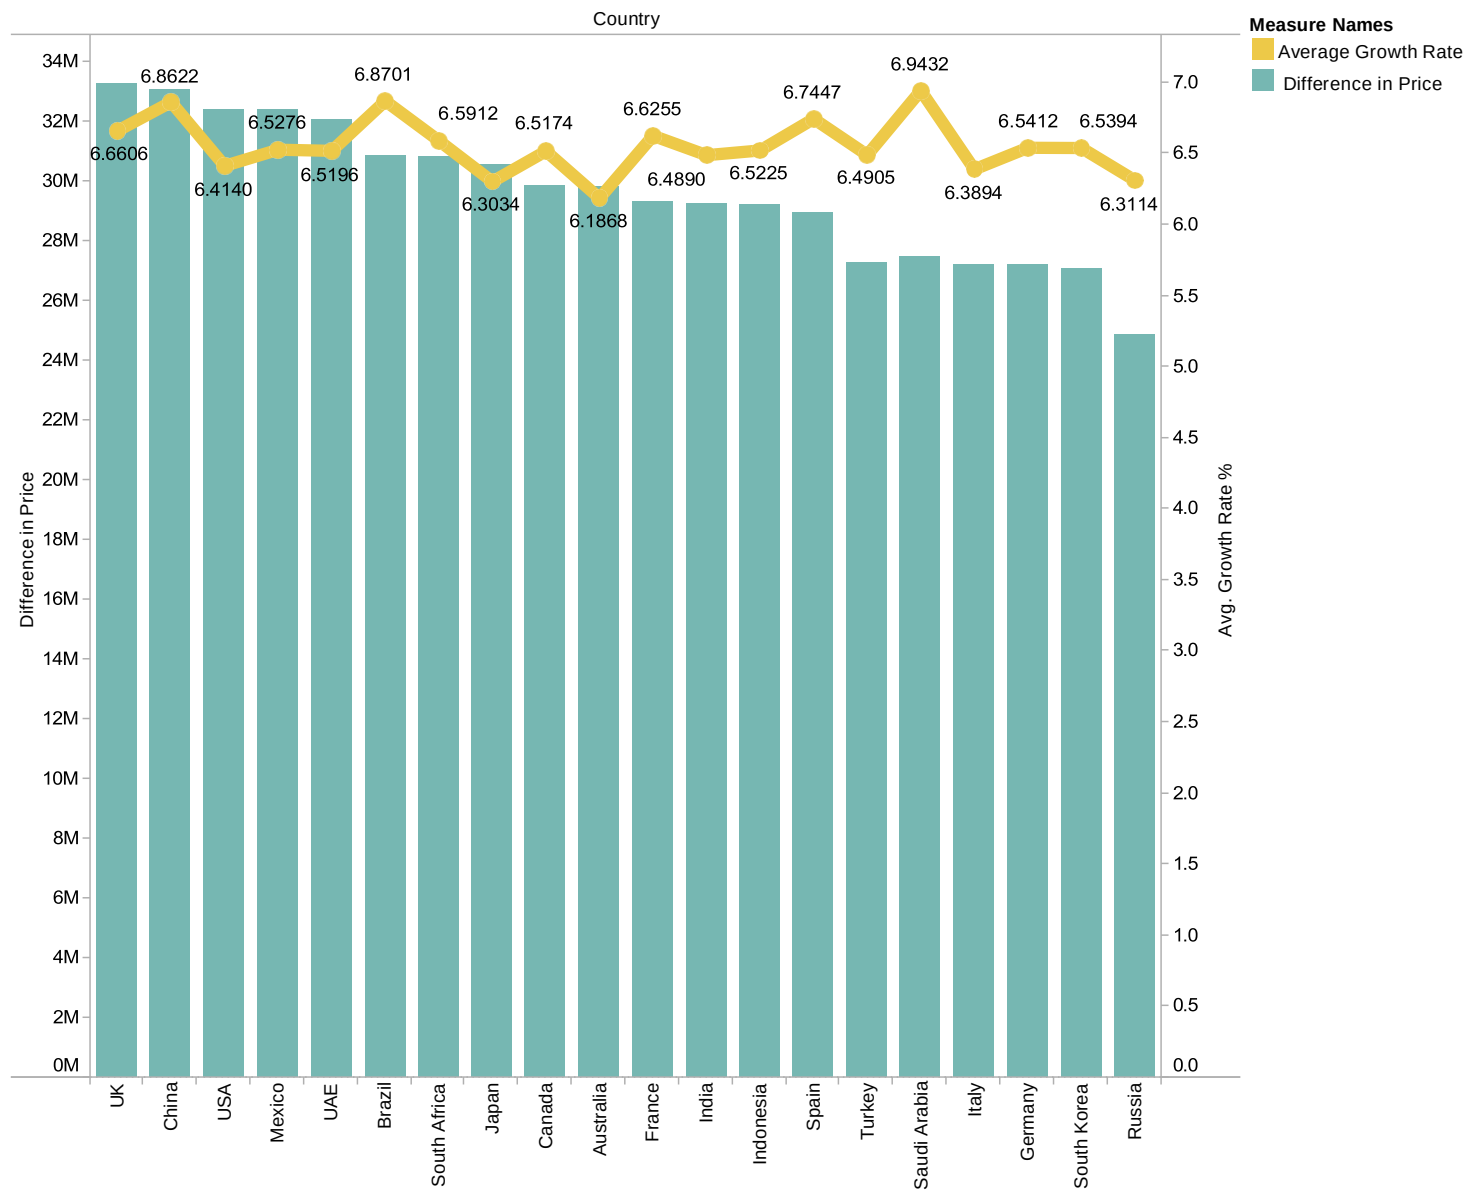

The data has been acquired from online source in CSV format.

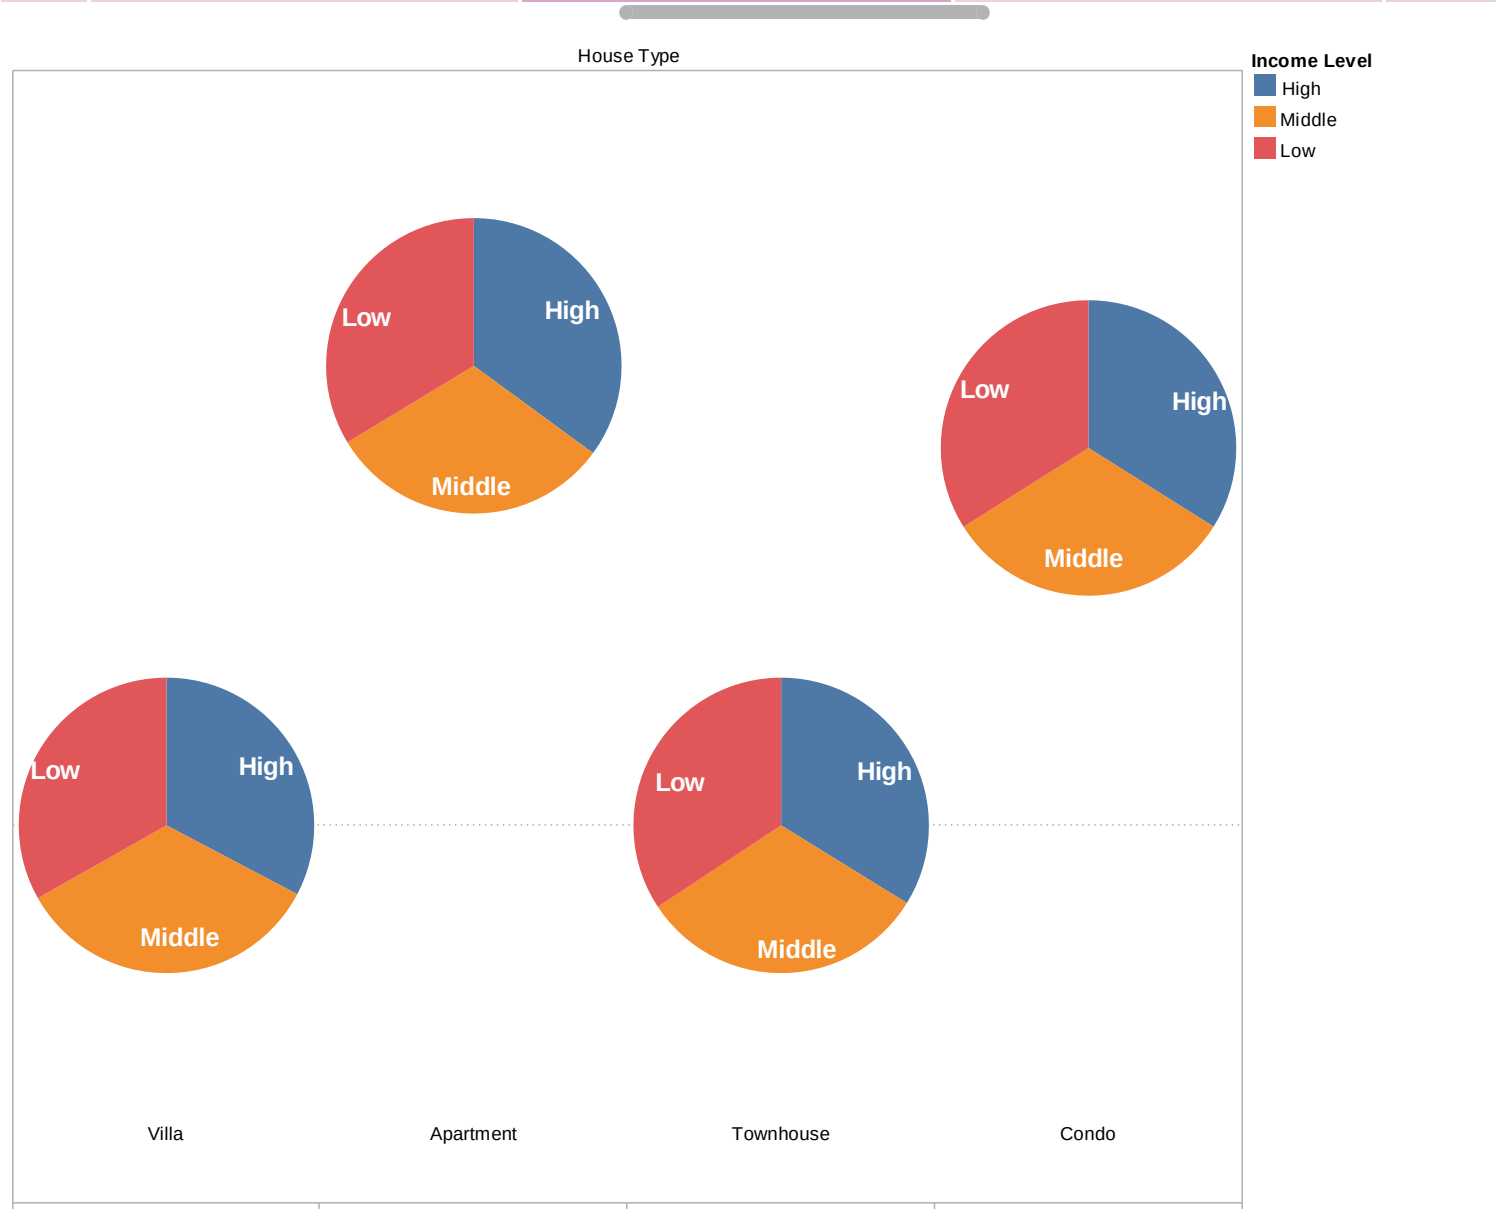

__ Data Cleaning:-

After that I cleaned the data in Excel Power Query, check the format and remove null values from it and also check the data type is it in correct form or not.

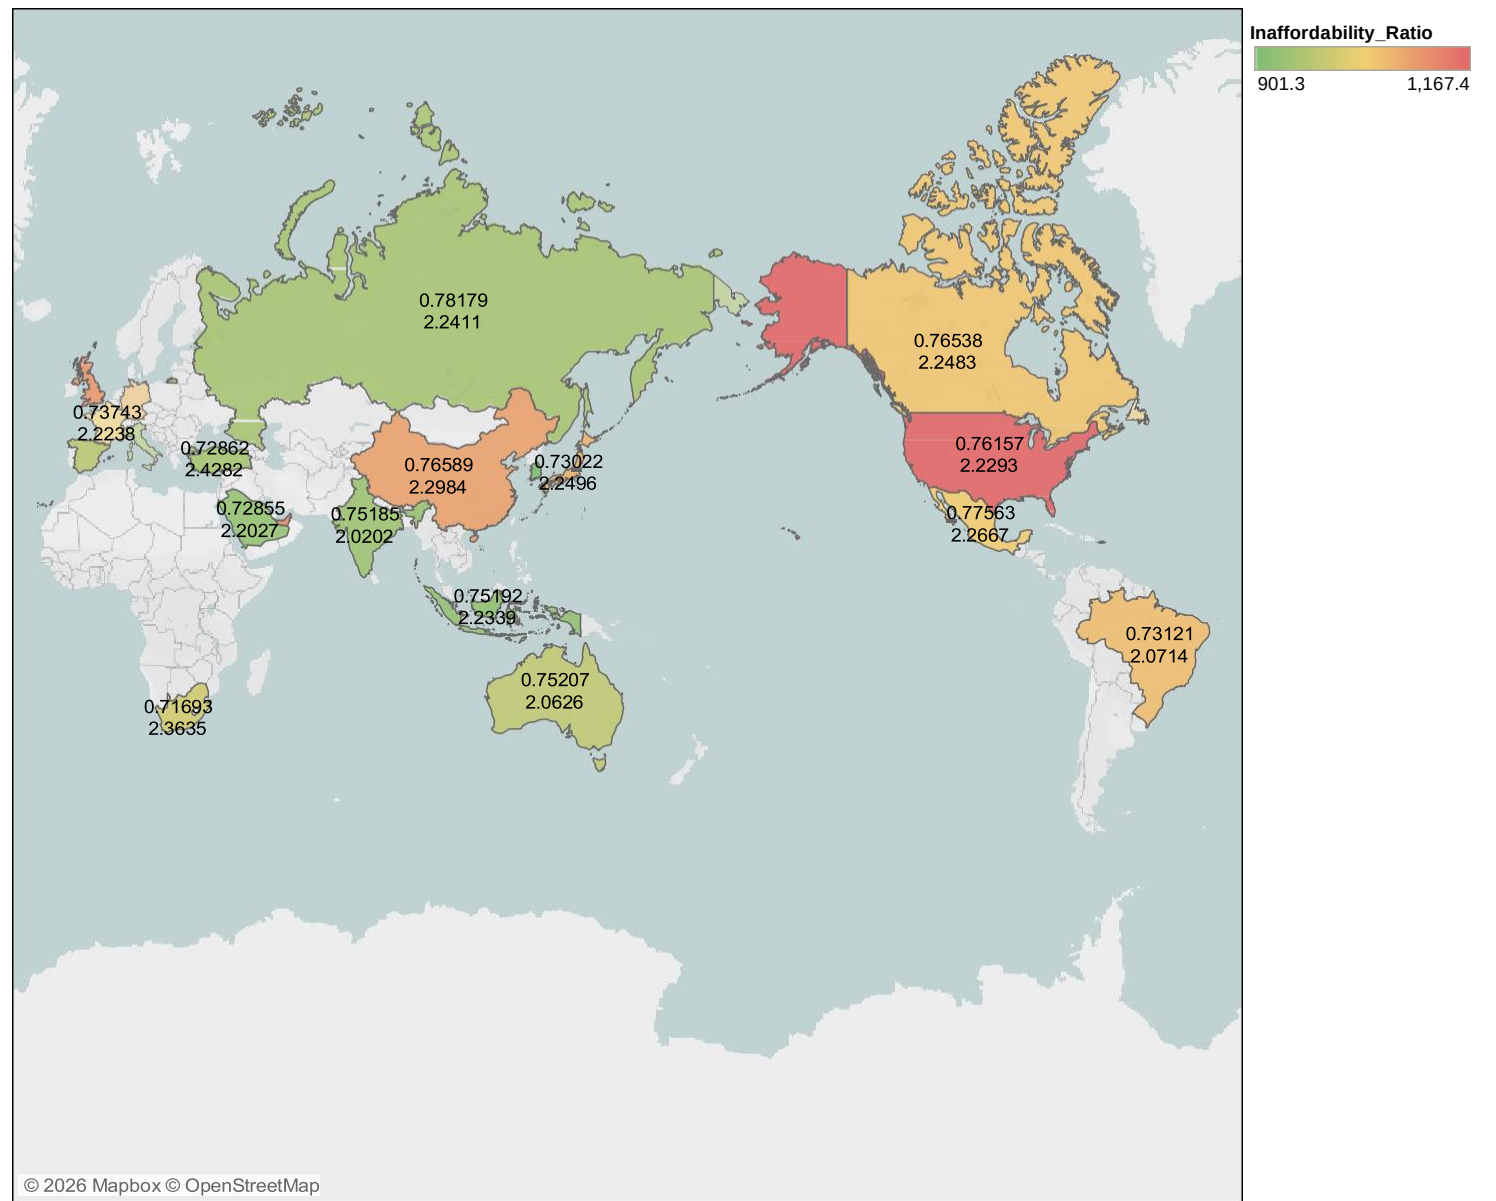

__ Further Adjustments:

Then I load the data in Tableau made further adjustments and started analyzing data by creating Charts in Sheets & Dashboard. And finally Creating a Story Presentation to Present the Work Done.

Price to PPP Index & Market Status	Dashboard of How growth Rate, Inaffordability Ratio & PPP Index influence Housing Affordability.	Dashboard of How Inflation Rate, Interest Rate & House Preference influence Housing Affordability across the Years o..	Conclusions
------------------------------------	--	--	-------------

Conclusions from this Analysis:

- Housing prices show a strong upward trend across most countries.
- High price growth does not always translate to better affordability.
- Regions with high PPP face housing affordability challenges.
- Population growth is a key driver of increasing housing demand and prices.
- High interest and inflation rates negatively impact affordability.
- Some emerging markets show rapid growth but higher financial risk.
- Stable markets offer balanced growth with moderate affordability levels.
- Declining markets indicate lower growth and potential investment risks.

The Housing Affordability Report based on this dataset provides valuable insights into global real estate trends, economic influences, and affordability challenges. The analysis helps in understanding how factors like PPP, income, inflation, and interest rates shape housing markets. These insights support data-driven decision-making and help identify investment opportunities, risk areas, and regions facing affordability issues.
